

55mm-110mm OD Deep Groove Ball Bearing Anti Corrosion 6006 6007 6009

Our Product Introduction

Basic Information

- Place of Origin: Shanghai
- Brand Name: YIKU
- Model Number: 6 Series
- Minimum Order Quantity: 1 piece
- Price: negotiable
- Packaging Details: box
- Delivery Time: 2-3month
- Payment Terms: L/C, T/T
- Supply Ability: 100 piece/month

Product Specification

- Name: Deep Groove Ball Bearing
- Model: 6 Series
- Material: Bearing Steel
- Quantity: 1
- Purpose: Guidance And Support
- Applicable To: Hydraulic Cylinder Sleeve
- Highlight: **Deep Groove Ball Bearing Anti Corrosion, 110mm Deep Groove Ball Bearing, 55mm grooved ball bearing**

Product Description

Deep groove ball bearing 6006 6007 6009 6200 6206 6212 6307

Model	inner diameter	outer diameter	thickness
	(mm)	(mm)	(mm)
6006	30	55	13
6007	35	62	14
6009	45	75	16
6200	10	30	9
6206	30	62	16
6212	60	110	22
6307	35	80	21

轴承由外圈、内圈、球体和保持架四部分组成。深沟球轴承，使用方便，是生产批量最大，应用范围最广的一种轴承。它主要用于承受径向载荷，也可承受一定的轴向载荷。当轴承的径向游隙加大时，具有角接触球轴承的功能，可承受大的轴向载荷，与尺寸相同的其他类型轴承相比，此轴承摩擦因数小，极限转速高。在高速不宜采用推力球轴承的情况下可用深沟球轴承承受轴向载荷。轴承损坏及超期使用小，必须更换。

The rolling bearing is composed of four parts: outer ring, inner ring, rolling body and cage. The deep groove ball bearing has the advantages of simple structure and convenient use, and is a kind of bearing with the largest production batch and the widest application range. It is mainly used to bear radial loads, but also can bear a certain axial load. When the radial clearance of the bearing is increased, it has the function of angular contact ball bearings, which can withstand large axial loads. Compared with other types of bearings of the same size, such bearings have small friction factor and high limit speed. In the case of high speed is not suitable for the use of thrust ball bearings can be used to bear the pure axial load. Bearings damaged and more than hours of use, must be replaced.
